

For a Smarter and Safer Oil Change

SMART-O[®]

THE INTELLIGENT SUMP PLUG

Protect your Engine and Our Planet

SMART-O is more than a innovative oil drain (sump) plug. It is also a safety system for the engine, the customer, your business and the environment. Through a patented sealing and retention mechanism it offers a significant improvement in sealing performance, product range and marketability.

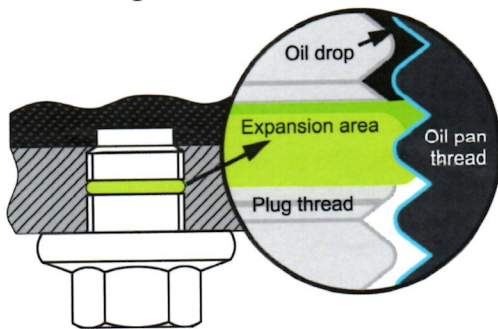

Anti-leak:

Intelligent material O-ring expands upto 10% when exposed to engine-oil and seals the oil pan from inside.

Anti-vibration:

Tested to resist excessive vibration forces. Reduces risk of plug falling out if not tightened correctly.

Internationally Patented Product:

The only plug where the O-ring is located on the thread of the plug. Works as a seal and locking mechanism.

Clever plug ID - faster identification:

Plug head marking prevents mixing up plugs, aids easy part search for quick matching up and installation!

Unified torque - faster installation:

The prevailing torque created by the seal allows for simple, unified torque settings for all vehicles.

ECO-protection:

Engine oil is a major water pollutant - 1 litre oil can pollute 1 million litres of water. SMART-O offers maximum protection against sudden loss of engine oil. The black coating is also free of the toxic Cr6 chrome plating.
